Course Objective:

The Skeletal Recovery Workshop is a 40-hour course including detailed lectures and hands-on field exercises. Students will perform a full mock grave excavation. This workshop is designed to teach students how to search for clandestine graves and scattered remains, perform grave excavations, collect evidence, and much more! The workshop caters to students from all levels of experience, such as coroner investigators, detectives, criminalists, crime scene investigators, etc. Other topics include forensic entomology, human decomposition, mass fatalities, coroner-related law, prosecution of cases involving recovered remains, bones used in rituals, and human remains detection canines.

For more information or to register, please contact:

Brian Kim, MPA, D-ABMDI
Lieutenant

Nani Cholakians, D-ABMDI
Investigator

Email: skeletalrecovery@coroner.lacounty.gov

*Class is limited to 30 students only per workshop. Due to popularity, seats fill quickly! Please ensure you register as soon as possible to guarantee a spot in the class!
